### PROJECTS

#### Automated Doctor Appointment Scheduling using AI chatbot

*[Flutter, Dart, Firebase, Rasa] [Github]*

- Developed a Flutter-based mobile app integrating an AI chatbot (Rasa) for multilingual voice/text interactions, user/admin panels, and real-time notifications.
- Implemented live GPS tracking, Google Maps for routing, and seamless backend integration using RESTful APIs

#### Income and Expense Tracker App (FinTrack)

*[Flutter, Firebase, Dart] [Github]*

- Built a Flutter app with Dart, integrating Firebase Authentication, Firestore database, and email-based password reset functionality.
- Enabled user account management, budget setting, transaction history tracking, and dynamic financial reporting.

#### Frinora – Cross-Platform eCommerce Application

*[Dart, Flutter, Firebase Authentication, Cloud Firestore, Firebase Hosting, HTML, CSS, JavaScript, React.js] [Github]*

- Developed a full-featured eCommerce platform using with user/admin panels, category-wise product listing, search functionality, registration, product rating and review and account management.
- Integrated Firebase for authentication and database management; planning to add transaction and payment gateway support in future updates.

#### Event Management Website

*[HTML, CSS, JavaScript, PHP, MySQL, XAMPP] [Github]*

- Implemented core features including user/admin panels, admin dashboard, search functionality, event booking, pricing display, customer reviews, and a responsive homepage.
